Quick Setup Guide (CM685V/CM820V/CM770W/CM950W)

Setting the basic connection and APN

1. Insert the SIM card (standard size) in the SIM card tray at the back of the modem.
2. Before switching on the modem, please ensure the antennas are securely connected. Connect the AC supply pack that comes with the modem.
3. Connect the modem's LAN port to a PC via a RJ45 cable. Set the PC to obtain an IP address automatically from the modem router. The PC will get an IP of the range 192.168.1.xxx.
4. Open a web browser and type in **192.168.1.1** in the address bar. A login window will pop-in, enter the login details as: Username: **admin** Password: **admin**
5. Go to System->Password->Web Account and change the Username/Password (recommended)
6. Set the APN by navigating to: Network- >Mobile. Enter the APN (default is telstra.internet) in the APN field. Click the **"Save & Apply"** button. After synchronising with the network, refresh the Status page and the Cellular Status should show "UP".

   Note: The WiFi password is: **m2mrouter168!!!** For more details on configuring the modem settings, please visit our FAQ page on https://comset.com.au/faq
