

Comset 3G/4G/5G Router Firmware Upgrade Procedure

Important: Update the firmware via local network with a LAN cable directly connected to your PC.

A. Comset CM210Q-W, CM510Q-W and CM550W

- 1. Save the new firmware on your PC.
- 2. Navigate to Administration > Upgrade.
- 3. Click on "Browse" and select the firmware file.
- 4. Click "Upgrade". See screenshot below.
- 5. Wait 3-5 minutes for the modem to initialise and synchronise with the network.
- 6. Login to check the status page.

Identification	Upgrade Firmware	
Time	Select the file to use:	
Admin Access	1.	Browse Opgrade
Scheduler Redoot	After flashing, erase all data in NVRAM memory	
M2M Settings	Current Version: Router-4.2.2.3-160928-170410 Free Memory: 49.01 MB (aprox. size that can be buffered completely in RAM)	
DI/DO Setting		
Configuration		
Logging		

B. Comset CM685V, CM820V, CM770W and CM950W

- 1. Save the new firmware on your PC.
- 2. Navigate to System > Upgrade.
- 3. Click on "Browse" and select the firmware file.
- 4. Click "Upload image" then confirm. See screenshot below.
- 5. Wait 3-5 minutes for the modem to initialise and synchronise with the network.
- 6. Login to check the status page.

Note: Uncheck "keep Settings" to get the router to factory default.
